

Heavy Duty Topple Barrier

Designed to segregate pedestrians and protect them from vehicles and the danger of toppling bulk goods, the Heavy Duty Topple Barrier is a robust, impact resisting barrier that offers supreme safety in multiple height variations.

This fully modular system can be tailored to suit both high and low-level storage areas, while the proven fork-impact protection of the ForkGuard is included as standard.

Energy Absorption System

A patented 3-phase system that activates sequentially for unparalleled energy absorption.

- 1 Memaplex[™] rail flexes to absorb impact, initiating the rail pin to slide forward and transfer load energy to the compression pocket.
- Compression of the pocket continues to disperse energy as the coupling rotates around the post pin to activate further absorption.
- At peak energy, the coupling twists further, engaging the post pin and instigating torsion of the post to dispel remaining forces.

High rack stacker

Electric tow tractor

Unrivalled recovery through a unique built-in memory that allows the barrier to flex, cushion and reform repeatedly upon impact, saving vast amounts in barrier and vehicle repairs.

Huge return on investment from incident prevention and downtime avoidance as barriers, vehicles, floors and equipment do not need replacing or repair.

Features and benefits

Multi-directional system ensures a streamlined fit into any operation and the removal of hard angles.

Ultra-low maintenance material is chemical and water resistant, non-corrosive, non-scratch and self coloured so no repainting, rusting, flaking or corrosion.

Exclusive modularity allows rails and posts to be replaced in-situ without removing adjacent barrier sections.

Self coloured and UV stabilised for continued visibility and long lasting aesthetics with no repainting.

ForkGuard included as standard to protect walls, stored goods and pedestrians from damage or injury as a result of fork impacts.

Food safe, wipe-clean, water resistant surface.

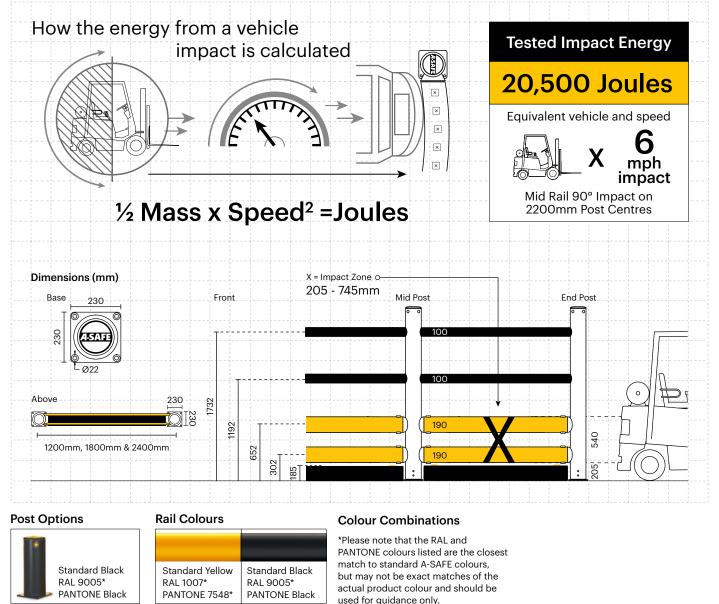

Environmentally friendly and 100% recyclable.

Zinc nickel, electrophoretic coating on base plates as standard, provides advanced protection against corrosion damage.

Technical Information

Impact Test	Impact Angle on 2200mm Post Centres				
	90°	67	7.5°	45°	22.5°
Mid Rail Max Energy (Joules)	20,500	24	,017	41,000	139,983
End Post Max Energy (Joules) - 90° 6,900					00
End Post Max Energy (Joules) - 90°)°	6,900	
Deflection at Max Energy 380mm			Force to Bolt		
Post Ground					

Material Properties	MEMAPLEX [®]	
Temperature Range	-10°C to 50°C	
Ignition Temperature	370°C to 390°C	
Flash Point	350°C to 370°C	
Toxicity	Not Hazardous	
Chemical Resistance	Excellent - ISO/TR 10358	
Weathering Stability (Grey Scale)	5/5*	
Light Stability (Blue Wool Scale)	7/8**	
Static Rating (Surface Resistivity)	1015 - 1016 Ω	
Hygiene Seals	No	

* Weathering scale 1 is very poor and 5 is excellent

** Light stability scale 1 is very poor and 8 is excellent
